RAVEN

DESKTOP SMARTPHONE

MORE THAN A DESKTOP PHONE

Raven **fuses the best from all the phones you know**. The familiar form of **desktop phone**, SIM card and smart features of your **smartphone** and even generous touchscreen like on your **tablet**.

RAVEN THINKS ABOUT YOU

What you know and like on your smartphone, it is all in the Raven.

Intuitive touch control, applications and synchronization.
Latest trends brought to your desk, ready for office use

DESIGNED TO IMPRESS

The elegant curves of the phone are inspired by proud raven's silhouette and brought to life using state-of-the-art technologies.

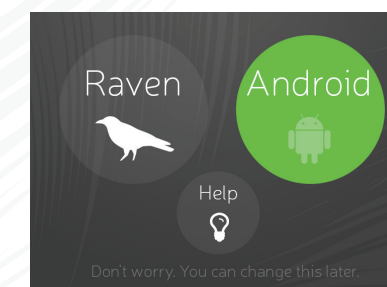

The deep black surface is smooth and **the phone looks great even to people entering your office**.

SIMPLE YET POWERFUL

The **intuitive touch interface** has large buttons right where you would expect them and as you have already used a phone, you know how to use the Raven.

Still the power of pure Android is available whenever you need it.

MADE FOR OFFICE

Raven is the natural centerpoint of your office. It gives you the relieving perspective over your day and helps you get tasks done.

Raven's integrated camera and sensitive microphone were made for videoconferencing.

Google Play provides applications for any kind of business and allows you to fit Raven to your specific needs.

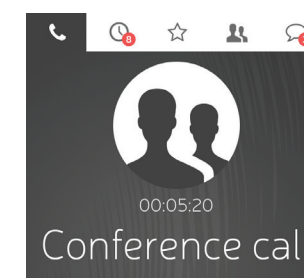

Raven synchronizes contacts and other important data with your mobile, maintaining one set of always up-to-date data across Microsoft and Google ecosystems.

READY FOR HEAVY DUTY

The Raven can be remotely managed and fits strict security policies with remote lock and wipe available.

Utilize the power of Android and get Raven integrated into your business by your IT department or any Android developer.

Heavy callers will be glad to find support for their favorite headsets and EHS.
